

### **Acra Tex 968 Elastometric**

Enhanced Reology, Elastomeric weatherproofing & anti-carbonation barrier coating. Specified as a topcoat elevating Texture System performance or as a stand-alone Anti-Carbonation coating for steel reinforced concrete.

DULUX AcraTex Elastomeric 201 is an enhanced mid-build. Elastomeric performance coating is applied by a conventional nap roller, delivering minimal roller stipple for even coverage and superior weather proofing and anti-carbonation properties. AcraTex is available in Matt only across the Dulux Colour Specifier, pastel, deep and ultra deep colour range. Elastomeric 201 delivers paint like appearance with a film build 2-3 times of standard decorative paint for an enhanced crack bridging performance.
