

## **DULUX AcraTex 955 AcraShield**

Elastomeric weatherproofing & anti-carbonation barrier coating. Specified as a topcoat elevating Texture System performance or as a stand-alone Anti-Carbonation coating for steel reinforced concrete.

DULUX AcraTex 955 AcraShield is a mid-build, Elastomeric performance coating applied by conventional nap roller or airless spray to form a finishing barrier coat in AcraTex Texture and Anti-carbonation systems. Available in Matt and Low Gloss finishes across the full Dulux Colour Specifier range, AcraShield delivers paint like appearance with film builds twice that of standard decorative paint for an enhanced crack bridging performance. AcraTex Texture Systems are specified with AcraShield, weather-proofing topcoat for an optimum life cycle efficiency.
